

Introduction to ArcIMS

Written by VidaGIS

Friday, 14 November 2008 16:46 - Last Updated Monday, 18 October 2010 23:38

ArcIMS training course will provide trainee sufficient information about ArcIMS, ArcIMS capacity in querying and manipulating map data and GIS through Internet.

Trainee will learn ArcIMS application procedures, create ArcIMS Web sites, study ArcIMS structure and install Arc IMS.

Lecturer

VidaGIS Lecturer has been training at ESRI Company, and granted the certificate of ESRI Authorized Instructor valued worldwide. The Company is a unique company in Vietnam awarded certificates for who completed courses.

The entire teaching facilities of courses are followed up the ESRI standard.

Learner

The course is used for people who first approach with ArcIMS and want to use ArcIMS to create and provide map services in Internet.

Skill achievements

- Comprehend concept and design ArcIMS viewers
- Use client functions
- Manage site
- Perform simple applications
- Install and study ArcIMS structure

Introduction to ArcIMS

Written by VidaGIS
